

CLAIMS

1 I claim:

2 1. A flexible magnetic layer based rubberized mat
3 comprising:

4 a layer of a flexible magnetic composition;

5 a layer of an adhesive composition on said magnetic
6 composition; and

7 a layer of a rubberized composition on said adhesive
8 composition;

9 whereby the layers of the magnetic composition, the
10 adhesive composition and the rubberized composition form a
11 unitary flexible mat for use on metal surfaces.

1 2. The mat according to claim 1, wherein the layers of the
2 magnetic composition, adhesive and rubberized composition are
3 coextensive in area.

1 3. The mat according to claim 1, wherein the rubberized
2 composition is neoprene rubber.

1 4. The mat according to claim 1, wherein the rubberized
2 composition is rubberized plastic.
